

Price list of high-quality galvanized cable trays in Hungary

AI Overview

Galvanized cable trays in Hungary typically range from €15 to €60 per meter, depending on type, size, and material quality.

Overview of Galvanized Cable Trays

Galvanized cable trays are widely used in industrial, commercial, and construction sectors for safe and organized cable management. Common types include:

- Ladder Cable Trays:** Feature transverse rungs for robust support and airflow; ideal for industrial plants and utility substations.
- Perforated Cable Trays:** Flat base with slots or holes for ventilation; suitable for HVAC systems, manufacturing floors, and mixed environments.
- Channel/Tray with Solid Base:** Provides full support and protection for cables; used in server rooms, control panels, and high-contamination areas.

Price Factors

The cost of galvanized cable trays in Hungary depends on several factors:

- Material and Coating:** Hot-dip galvanized steel offers superior corrosion resistance and durability, which increases the price compared to mild steel or powder-coated trays.
- Tray Type and Size:** Ladder trays are generally more expensive than perforated trays due to structural complexity. Width, height, and load-bearing capacity also affect pricing.
- Customization:** Custom lengths, bends, and accessories (like covers or supports) can raise the overall cost.
- Supplier and Brand:** Well-known suppliers like Brilltech and Cable House provide premium quality trays with after-sale support, which may be priced higher than generic options.

Typical Price Range

- Perforated trays: €15–€30 per meter
- Ladder trays: €25–€50 per meter
- Solid-bottom trays: €30–€60 per meter

These prices are indicative and may vary based on order volume, delivery, and installation requirements. For precise quotations, contacting local suppliers such as Brilltech Engineers or Cable House in Hungary is recommended.

Conclusion

When budgeting for galvanized cable trays in Hungary, c...
