

Price of 4-core single-mode indoor optical cable

AI Overview

The price of a four-core single-mode indoor optical cable typically ranges from \$0.50 to \$2 per meter, depending on quality, jacket type, and additional features.

Pricing Overview

The cost of a 4-core single-mode indoor optical cable varies based on several factors:

- Material and Quality:** High-quality cables use pure quartz fibers, aramid yarn reinforcement, and flame-retardant jackets, which increase durability and performance, raising the price.
- Jacket Type:** LSZH (Low Smoke Zero Halogen) or PVC jackets affect cost. LSZH is safer for indoor use but slightly more expensive.
- Length:** Prices are often quoted per meter or per spool. Bulk purchases usually offer discounts, making longer runs more economical.
- Pre-Termination:** Cables pre-terminated with connectors like LC, SC, or FC carry a premium due to labor and precision involved.
- Certifications:** CE-certified or ITU-T G.652.D compliant cables ensure reliability and may cost more.

Typical Price Examples

Alibaba bulk listings: Indoor 4-core single-mode cables are available for around \$0.50–\$1.50 per meter for large orders.

ME Fiber Optic LSZH indoor cables: High-quality tight-buffered 4-core cables suitable for indoor distribution are priced around \$1–\$2 per meter, depending on length and specifications.

Aliexpress options: Prices vary widely, often \$1–\$2 per meter, but quality may differ, and some cables may have issues with buffer coating or tolerances.

Recommendations

When purchasing, consider total cost of ownership rather than just upfront price. Cheaper cables may lack proper tensile strength, flame retardancy, or certifications, leading to higher maintenance costs or installation issues. For indoor installations, LSZH or flame-retardant jackets are recommended, and pre-terminated options can save labor time and reduce splice losses.

In summary, expect to pay \$0.50–\$2 per meter for a reliable four-core single-mode in...
