

Price of 722S Spectrometer

AI Overview

The 722S Spectrometer typically ranges from approximately \$1,200 to \$2,500, depending on the vendor, model variant, and included features. The 722S Spectrometer is a versatile laboratory instrument designed for measuring transmittance, absorbance, and direct concentration readings of transparent materials across a wavelength range of 340nm to 1000nm. It is widely used in chemistry, pharmaceuticals, environmental monitoring, food quality control, and educational laboratories. Variants include UV-Vis, near-infrared, and Fourier Transform models, each tailored for specific analytical applications.

Pricing Overview: Alibaba lists multiple 722S variants, often with factory or bulk pricing, which can start around \$1,200 for standard models and increase for advanced UV-Vis or NIR versions. Amazon offers the 722S Visible Spectrophotometer for approximately \$1,500–\$2,000, depending on shipping and vendor promotions. Made-in-China and other industrial suppliers provide factory-direct pricing, which may be negotiable for bulk orders or custom configurations.

Factors Affecting Price: Model type (UV-Vis, NIR, FTIR) Included accessories (RS232 interface, microprinter, software packages) Vendor location and shipping costs Warranty and after-sales support

Recommendation: For the most accurate and up-to-date pricing, it is advisable to contact suppliers directly through platforms like Alibaba, Amazon, or specialized laboratory equipment distributors. This allows you to compare quotes, inquire about bulk discounts, and confirm shipping and warranty options.
