

Price of Custom-Made Explosion-Proof Distribution Boxes in Sweden

AI Overview

Custom-made explosion-proof distribution boxes in Sweden typically range from €1,000 to €10,000 or more, depending on size, material, and certification requirements.

Price Factors

The cost of a custom-made explosion-proof distribution box depends on several key factors:

- Material:** Stainless steel (AISI 304L or 316L) and GRP polyester enclosures are common. Stainless steel is more expensive but offers higher durability and corrosion resistance.
- Certification:** ATEX and IECEx certifications for hazardous areas (zones 1, 2, 21, 22) increase cost due to compliance testing and documentation.
- Size and Complexity:** Larger enclosures or those with multiple compartments, integrated control panels, or high-capacity terminal blocks can significantly raise the price.
- Customization:** Tailored dimensions, special mounting options, or additional features like IP66 waterproofing, hinged doors, or side-opening latches add to the cost.
- Delivery and Lead Time:** Ready-made stock units may be available for same-day shipping, while fully customized units can take longer and cost more.

Market Context in Sweden

Sweden's market for explosion-proof power distribution boxes is growing due to investments in mining, defense, chemical manufacturing, and battery production. The market is estimated at around €450 million, with annual growth of 2-3%. Regulatory enforcement by the Swedish Work Environment Authority encourages widespread adoption of certified explosion-proof units, which can influence pricing and availability.

Suppliers in Sweden

Several suppliers provide custom-made solutions:

- Atex Delvalle:** Offers stainless steel and GRP enclosures with ATEX/IECEx certification, including wall-mounted and large XXL enclosures.
- R. STAHL:** Provides bespoke terminal and junction boxes with global certification and short delivery times.
- Ahlsell:** Offers a range of distribution boxes su...
