

Price of Customized Fire Cable Trays in Belgium

AI Overview

The price of customized fire-resistant cable trays in Belgium varies widely depending on material, size, and specifications, typically ranging from €50 to €300 per meter for standard customization, with higher costs for specialized fire-rated designs.

Factors Affecting Price

- Material Type:** Cable trays can be made from galvanized steel, stainless steel, or fiberglass, with stainless steel and fiberglass generally costing more due to corrosion resistance and fire performance.
- Customization:** Custom dimensions, perforation patterns, and load-bearing requirements increase costs. Suppliers like Brilltech Engineers offer full customization based on project needs.
- Fire Resistance:** Fire-rated trays require special coatings or materials that comply with fire safety standards, which can significantly increase the price compared to standard trays.
- Length and Design:** Ladder, perforated, and solid-bottom trays have different manufacturing costs. Longer runs or complex bends and junctions add to the total price.
- Supplier Services:** Installation support, design consultation, and delivery logistics can affect the overall cost. Companies like Trayco and Brilltech provide technical assistance and system design support.

Supplier Options in Belgium

- Brilltech Engineers Pvt. Ltd:** Offers high-quality, fire-resistant, and fully customizable cable trays in galvanized steel, stainless steel, and fiberglass. They provide design support and installation guidance.
- Trayco:** Supplies a wide range of cable trays, ladders, and mesh trays suitable for industrial and commercial projects, with customization options available.
- Local B2B Suppliers:** Platforms like Europages list multiple Belgian suppliers, including Vergokan and Demo Belgium, which provide both standard and custom cable support systems.

Recommendation For an accurate price, it is best to contact suppliers directly with your project specifications, including length, material...
