

Price of New Aerial Optical Cable

Overview

Median costs in 2025 were \$18 per foot for underground builds and \$8 per foot for aerial builds, with significant variation based on terrain, density, and construction methods, according to the Fiber Broadband Association. Aerial fiber optic cables are a cornerstone of modern telecommunications, designed for overhead deployment on utility poles or other elevated structures. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help. Getting accurate cost estimates is crucial for winning fiber installation bids. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000.
