

Price of Outdoor Distribution Box Base Set

AI Overview

The price of an outdoor distribution box base set varies widely depending on size, material, IP rating, and customization, typically ranging from \$50 to several hundred dollars per unit, with bulk orders reducing per-unit cost.

Factors Affecting Price

Material and Construction: Outdoor distribution boxes are commonly made from galvanized steel, stainless steel, or high-grade polymers. Metal enclosures generally cost more due to durability and corrosion resistance, while polymer boxes may be cheaper but still offer weatherproofing.

Size and Capacity: The number of circuits, busbar rating, and internal mounting panels influence cost. Larger boxes with higher amperage ratings or more circuits are priced higher.

Weatherproofing and IP Rating: Boxes with IP65, IP66, or IP67 ratings, which protect against dust and water jets, are more expensive than standard enclosures. NEMA 3R, 4, or 4X equivalents in North America also affect pricing.

Customization and OEM Options: Custom features such as logo embossing, top cable entry modifications, or specialized busbar fitment increase the price. Factories often provide quotes for OEM or bulk orders.

Order Volume: Wholesale pricing decreases per unit with larger orders. Single units may cost more, while distributors purchasing in bulk can secure lower rates.

Typical Price Ranges

- Small, basic polymer boxes: \$50–\$100 per unit
- Medium metal boxes with standard IP rating: \$100–\$250 per unit
- Large, high-capacity, weatherproof or customized boxes: \$250–\$500+ per unit

For precise pricing, it is recommended to contact suppliers directly through platforms like Alibaba, Made-in-China, or Amazon, providing specifications such as size, material, IP rating, and quantity to receive a tailored quote.

Additional Considerations

Shipping and delivery times can affect total cost, especially for custom or large orders.
