

Price of curved cable tray bends

AI Overview

Cable tray curve bends in the UK typically range from £10 to £50 per piece, depending on material, size, and type.

Pricing Overview

Medium Duty Pre-Galvanised Steel Bends: These are commonly used for commercial and industrial projects. Prices generally start around £10-£20 for smaller 90° bends and can go up to £40-£50 for larger or adjustable bends.

Adjustable Bends (e.g., 225mm Pre-Galvanised Steel): Adjustable bends designed for flexibility in installation are usually priced at £30-£50, depending on width and load capacity.

PVC or Coated Bends: Lightweight PVC or polymer-coated bends for office or indoor use are typically £10-£25 per piece, depending on size and bend radius.

Factors Affecting Price

Material: Steel (galvanized or stainless) is more expensive than PVC or polymer-coated bends.

Bend Angle and Type: 90° bends, vertical or horizontal, and inside/outside radius bends may vary in cost. Adjustable bends are generally higher priced due to their versatility.

Size and Width: Wider cable trays or larger diameters increase the price.

Brand: Leading brands like Armorduct and Unistrut may carry a premium.

Delivery and Bulk Orders: Many suppliers offer free delivery for orders over £100, which can reduce overall cost for larger projects.

Purchasing Tips

Check compatibility with your existing cable tray system (ladder, perforated, or solid bottom). Consider adjustable bends if your installation requires flexibility around obstacles. Compare suppliers like Netceed, Platt Electric, Shop4 Electrical, CMW Ltd, and Rexel UK for pricing, stock availability, and delivery options. Bulk orders often reduce per-unit cost and may qualify for free next-day delivery. By considering material, size, and supplier, you can select cable tray bends that fit both your project requirements and budget.
