

Price of on-site placement of level 3 distribution box

AI Overview

The cost of placing a level 3 distribution box typically ranges from HKD 3,000 to HKD 10,000 or more, depending on specifications, brand, and installation requirements.

Cost Breakdown

- 1. Purchase Price:** Level 3 distribution boxes, often used in commercial or industrial settings, vary in price based on the number of circuits, amperage capacity, and material quality. Standard units from brands like Schneider Electric, Siemens, or ABB can cost HKD 2,000–6,000 for the enclosure alone, while more advanced units with smart monitoring or three-phase capabilities may exceed HKD 10,000.
- 2. Installation Costs:** Installation involves connecting the box to the main supply, wiring circuits, and ensuring compliance with electrical codes. Labor costs in Hong Kong typically range from HKD 1,000 to HKD 4,000, depending on complexity, accessibility, and whether additional protective devices like MCBs or RCBOs are included.
- 3. Additional Considerations:**
 - Customization:** Special mounting, labeling, or integration with building management systems can increase costs.
 - Environmental Rating:** Outdoor or weather-resistant boxes carry a premium.
 - Maintenance and Safety Features:** Units with advanced monitoring, surge protection, or energy management capabilities may have higher upfront costs but reduce long-term maintenance expenses.

Summary

For a level 3 distribution box, which is typically a final distribution board for localized control in larger buildings or industrial facilities, the total cost including purchase and installation is generally HKD 3,000–10,000, with higher-end models or complex installations potentially exceeding this range. Always consider the number of circuits, amperage, brand, and additional features when budgeting for a distribution box.
