

Price quote from fiberglass composite cable tray manufacturers

AI Overview

Fiberglass composite cable trays typically range from \$20 to \$150 per meter depending on type, resin system, and customization, with factory-made trays generally more cost-effective than hand-made options.

Price Overview Fiberglass cable trays, also known as FRP or GRP trays, are available in hand-made and pre-manufactured forms. Hand-made trays are custom-built for specific applications, offering high durability and flexibility but at a higher cost due to labor-intensive production and long lead times. Pre-manufactured trays are produced in factories under controlled conditions, making them less expensive and suitable for standard installations.

Typical price ranges vary based on tray type, size, and resin system:

- Ladder trays: \$30-\$120 per meter, depending on load capacity and resin type
- Channel or trough trays: \$20-\$100 per meter, often used for lighter loads or compact installations
- Custom or heavy-duty trays: \$100-\$150 per meter, especially for offshore, chemical, or high-load industrial applications

Factors Affecting Cost

Resin System: Polyester resin trays are generally less expensive than vinylester resin trays, which offer higher chemical and UV resistance.

Tray Size and Load Capacity: Larger trays or those designed to support heavy cables cost more due to increased material usage and structural reinforcement.

Customization: Custom dimensions, colors, or flame-retardant features increase the price, particularly for hand-made or OEM orders.

Volume and Supplier: Bulk orders from factory-direct manufacturers or verified suppliers in China can reduce per-meter costs, while small orders or specialized suppliers may be more expensive.

Manufacturer Options

- MP Husky:** Offers pultruded FRP trays with polyester or vinylester resins, suitable for offshore and industrial applications, emphasizing durability and corrosion resistance.
- Apex Tray:** Provides F...
