

Recommended Lebanese power distribution box

AI Overview

Top recommended power distribution boxes in Lebanon include Legrand XL³, Practibox, Nedbox, Geros, Olan, and SMC enclosures, covering residential to industrial needs.

Residential and Small Commercial Installations For homes and small commercial buildings, Legrand Practibox S, Drivia, XL³, XL³ S, and Plexo³ offer modular solutions ranging from 4 to 72 modules, with 13 or 18 modules per row. These cabinets are designed for easy wiring, modern aesthetics, and reliable operation, suitable for standard residential and small commercial power distribution.

Industrial and High-Power Applications For larger installations, the Legrand XL³ system supports enclosures from 125 A to 4000 A, with options for standard, optimized, or increased safety distribution. These are ideal for machinery, equipment, and lighting systems, and can be paired with Zucchini busbars for low, medium, or high power requirements up to 5000 A. EdM Zucchini cast resin transformers complement these systems for applications up to 20,000 KVA.

Plastic and SMC Enclosures For lightweight, flame-retardant, and watertight options, plastic boxes from Geros and Olan provide IP65/IP66 protection, suitable for safe cable management and outdoor installations. SMC enclosure boxes offer high mechanical and impact strength, low weight, and flame retardancy, making them suitable for factories and commercial projects.

Local Suppliers

- MO Electric:** Offers plastic electrical boxes and waterproof enclosures for residential and commercial use.
- ACM Lebanon:** Provides nationwide delivery of electrical distribution boxes and panel boards.
- Hermes Trading:** Supplies Legrand XL³, Practibox, and Nedbox solutions for various installation types.
- ELU Lebanon:** Specializes in SMC enclosures for industrial and commercial applications.
