

Recommended WAN Port Fiber Optic Router

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. Fiber internet delivers symmetrical multi-gig speeds right to your ONT, but a cheap or outdated router turns that premium connection into a frustrating bottleneck. The wrong router can leave you paying for 2 Gbps of fiber while struggling with buffering, lag spikes, and dead zones on a 200 Mbps. In this guide, I'll rank the best routers for fiber internet based on their performance, features, ease of use, and affordability. Keep reading for a rundown of the best fiber optic internet routers in 2026.
