

Router fiber optic light is pink

Overview

Orange, amber, or red lights usually indicate a problem ranging from a firmware update in progress to a lost internet connection. Most of these issues can be resolved with a simple power cycle (unplug for 30 seconds, plug back in). What does that blinking light on your modem or router mean?

This guide covers every LED color and pattern across Xfinity, Spectrum, AT&T, and CenturyLink gateways, with step-by-step fixes for the most common issues. If you have ever glanced at your modem or router and seen an unfamiliar blinking. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. Most common. Router status lights, often referred to as LED indicators, are small lights on the front panel of your router. These lights help users understand the operational state of the device and its various components. Typically, these lights correspond to various router functions such as power. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do.
