

Router with 10M fiber optic cable

AI Overview

For a 10-meter fiber optic connection, high-performance routers with 10G LAN/WAN ports and Wi-Fi 7 support are ideal for maximizing speed and reliability. Key Considerations When connecting a fiber optic cable to a router, the following factors are important:

- 10G LAN/WAN Ports:** Ensure the router has at least one 10G port to fully utilize high-speed fiber connections, especially for multi-gigabit internet plans.
- Wi-Fi Standard:** Wi-Fi 7 (802.11be) routers provide the fastest wireless speeds and better handling of multiple devices, making them suitable for homes or offices with heavy internet usage.
- Coverage and Device Capacity:** Look for routers with strong internal antennas and MU-MIMO technology to support multiple devices simultaneously, often up to 100 devices.
- Future-Proofing:** Routers with LAN aggregation, dual 2.5G/10G ports, and advanced CPU processing can handle future upgrades and high-bandwidth applications like 4K/8K streaming, gaming, and AR/VR.
