

Selection Guide for 400G Industrial Ethernet Core Switches

Overview

This guide provides a practical, standards-based approach to selecting managed industrial Ethernet switches and designing robust OT networks. Switch selection is no longer a simple matter of speed upgrades, but a systemic engineering decision involving switching capacity, port density, chip architecture, power efficiency, cabling configuration, and future scalability. Different deployment phases and business models significantly impact. This Industrial Ethernet Switch Selection Guide is designed to help organizations make informed choices when selecting industrial Ethernet switches. How best to evaluate both hardware Ethernet switches, and suppliers for support of your applications. Extracted from ARC's most. Our Cisco N9000 Series Switches portfolio offers distributed modular, centralized modular, and fixed switches including super spine, spine, leaf, and border leaf. Experience breakthrough switch performance that delivers high capacity, speed, and efficiency. A Cisco Catalyst IE3300 Rugged Series or Cisco Catalyst IE3400 Rugged Series switch is recommended as a replacement.
