

Senegal tackles electrical distribution boxes

Overview

The Senegal Energy Access Scale-Up Project is building and rehabilitating nearly 4,000 kilometers of power lines and will bring electricity to 200,000 households, electrify 600 health clinics and 200 schools, and ensure that all distribution infrastructure is flood-resilient. With a national electricity access rate of 84%, Senegal is making progress towards universal energy access, yet more than 30 % of rural communities remain disconnected from the grid. French aut years and employ a total of more than 1,000 people. They involve building 1,350 km of high-voltage and very-high-voltage overhead and underground t ansmission lines to connect several thousand homes. Its objective: electricity for all by 2026. According to a statement, the project will be partially funded by French authorities. The three-year. VINCI Energies, a global player in concessions, energy and construction, has secured an EU€200mn (approx).
