

Silicon Production Singapore Company

AI Overview

Singapore is a key player in silicon production, particularly in the semiconductor industry, with significant investments in manufacturing facilities and advanced technologies. Overview of Silicon Production Singapore has evolved into a major hub for semiconductor manufacturing, focusing on various silicon products, including silicon wafers and silicon carbide chips. The country has attracted numerous global semiconductor companies due to its stable infrastructure, skilled workforce, and supportive government policies.

Key Developments in Silicon Production

Siltronic's Advanced Manufacturing Facility: In June 2024, Siltronic opened a \$2.9 billion facility in Tampines, which is expected to produce up to 100,000 silicon wafers per month by the end of 2024. This facility introduces silicon wafer epitaxy capabilities to Singapore for the first time, enhancing the electrical conductivity of the wafers.

STMicroelectronics: This company manufactures silicon carbide chips in Singapore, which are essential for applications in electric vehicles and data centers. STMicroelectronics has multiple facilities in Singapore and has been a significant player in the semiconductor sector since 1969.

Silicon Box: A semiconductor start-up, Silicon Box, has established a \$2.65 billion factory in Tampines, focusing on innovative chiplet technology. This facility is designed to produce chiplets for applications ranging from AI to electric vehicles, significantly boosting Singapore's advanced manufacturing capabilities.

GlobalFoundries: The company opened Fab 7H in Singapore in September 2023, which will produce image sensors and radio frequency chips, further diversifying the silicon production landscape in the region.

Economic Impact The semiconductor industry, including silicon production, contributes over 7% to Singapore's GDP. With the global semiconductor market expected to exceed \$1 trillion by 2030, Singapore's strategic investments in silicon manufacturing are positioning it as a critical player in the global supply chain.

Siltronic Singapore: One of the most modern and

Siltronic AG recently celebrated the 10th anniversary of its 300 millimeter wafer production at the Singapore site. The subsidiary Siltronic Silicon Wafer Pte. Ltd.

Top Silicon Wafer Manufacturers in Singapore

Discover all relevant Silicon Wafer Manufacturers in Singapore, including Silicon Connection and ADVANCED MICRO FOUNDRY PTE. LTD.

Top Singapore Semiconductor Manufacturing Companies 2025

Discover leading Singapore semiconductor manufacturing companies. Explore top firms, key players, and reliable suppliers. Click to access detailed analysis and strategic insights for your

Singapore boosts semiconductor sector with \$2 billion

Silicon Box, a Singapore-based cutting-edge semiconductor integration startup, launched its SGD 2 billion advanced semiconductor manufacturing

Singapore chip start-up Silicon Box turns unicorn, hitting

SINGAPORE – Singapore-based semiconductor start-up Silicon Box raised US\$200 million (S\$266 million) in a Series B round, it said on Jan 8. With

Silicon Box launches \$2 billion, state-of-the-art

Singapore, July 2023 – Silicon Box, a cutting-edge semiconductor startup, today unveiled its SGD 2 billion advanced semiconductor packaging fab aimed at

SYSTEMS ON SILICON MANUFACTURING COMPANY PTE LTD

Find company research, competitor information, contact details & financial data for SYSTEMS ON SILICON MANUFACTURING COMPANY PTE LTD of Singapore. Get the latest business insights

Siltronic AG produces first wafers in its new Singapore fab

Singapore, November 7, 2023 – Today Siltronic announced the production of the first wafers in its latest state-of-the-art 300 mm fab in Singapore. The production

20 Semiconductor Companies in Singapore to Know

Singapore semiconductor companies help power the world's supply of computer chips. Here are the top companies in this industry to know.

GlobalFoundries Acquires Advanced Micro Foundry,

GF now the largest pure-play silicon photonics foundry, expanding global manufacturing capabilities to serve a broader customer base and meet the

Siltronic AG celebrates the inauguration of the new fab in Singapore

As one of top 5 global wafer suppliers, Siltronic's new fab is a significant expansion that not only supplies to Singapore's semiconductor industry but also strengthens the resilience of the

Wafer manufacturer Siltronic opens \$2.9b facility in

The 150,000 sq m factory in Tampines – Siltronic's third production plant in Singapore – produces silicon wafers for semiconductors, which are used

SYSTEMS ON SILICON MANUFACTURING COMPANY PTE LTD

Semiconductor manufacturer Systems on Silicon Manufacturing Company (SSMC) is boosting its production in Singapore with the opening of a new facility on Tuesday (Nov 27).
