

South African Access Switch 1G

AI Overview

1G access switches in South Africa are available from brands like RUCKUS, Cisco, HPE, Juniper, and Huawei, offering PoE, stackable, and managed options for enterprise and SMB networks.

Popular Models and Features

- RUCKUS ICX 8100-48P:** Entry-level 48-port 1G PoE switch, suitable for small to medium networks. Features include PoE support, single Virtual Ethernet interface, and compatibility with FastIron firmware versions 10.0.20b_cd1 and later. Note that stacking and breakout ports are not supported.
- HPE Comware 5150 EI Series:** Stackable L3 access switches with 1 GbE downlinks and 10 GbE uplinks. Supports OSPF, EIGRP, ISIS, RIP, and routed access. PoE-enabled models provide up to 30W per port. Offers Intelligent Resilient Fabric (IRF) stacking for up to 9 members, enhancing redundancy and link aggregation.
- Cisco Catalyst 9300/9200 Series:** Enterprise-grade 1G access switches with advanced features like link aggregation, VLAN support, and unified user management. These switches are widely used in campus networks and support PoE and high availability.
- Juniper EX2300/EX3300:** 1G access switches with robust Layer 2 and Layer 3 capabilities, PoE support, and stacking options for scalable deployments.
- Huawei Access Switches:** Offer 1G, 10G, and higher-speed variants with PoE, VLAN, and link aggregation support, suitable for both SMB and enterprise networks.

Local Suppliers and Purchase Options

- ServerBasket South Africa:** Offers a wide range of access switches from Cisco, Juniper, and Huawei with fast delivery, installation support, EMI options, and bulk discounts.
- FirstShop South Africa:** Stocks RUCKUS ICX 8100 series switches with online ordering and 14-day returns.
- Pinnacle ICT:** Distributor of multiple networking brands, providing delivery across South Africa.
- Regal Security:** Offers a selection of network switches, including 1G access models.

Considerations When Choosing a 1G Access Switch

- PoE Requirements:** Ensure the switch provides sufficient power per port for devices like IP phones, cameras, or wireless access points.
