

Southeast Asia Data Center Integrated Cabling System

Overview

Synergy Research Group reports that hyperscaler capex in Southeast Asia rose 32% in 2025, reaching \$8. According to IDC's 2026 Southeast Asia Data Center Forecast, the market will grow at a CAGR of over 12% through 2030, with total IT capacity doubling by 2027. MPO. In 2026, Southeast Asia has emerged as one of the world's fastest-growing data center markets, driven by digital economies, cloud services, and 5G infrastructure. As hyperscalers and local operators race to build new facilities across Singapore, Indonesia, Vietnam, and Thailand, MPO (Multi-fiber. The simple answer is density. The average power per rack has shot up in recent years, with designs climbing from around 5–10 kW to as high as 50 kW per rack in new edge deployments. This creates a perfect storm of heat-related problems: Cable Congestion: Thick bundles of traditional copper cables. At SEAX, we specialize in simplifying digital connectivity across Southeast Asia. We deliver high-capacity, low-latency infrastructure and services through our subsea cable system and strategic partnerships.
