

Standard Price for Fireproof Cable Tray Connections

AI Overview

Fireproof cable trays typically range from \$20 to \$150 per meter depending on material, type, and fire rating. Pricing Overview Fireproof cable trays are available in various types, including trough, wire mesh, and composite trays, with materials such as stainless steel, aluminum, and fiberglass affecting the cost. Standard trough-type fireproof cable trays with covers generally start around \$20–\$50 per meter for basic aluminum or steel models, while high-end stainless steel or specialized fire-resistant trays can reach \$100–\$150 per meter. Prices may fluctuate based on supplier, order volume, and customization requirements. Factors Affecting Cost Material: Stainless steel is more expensive than aluminum or galvanized steel due to durability and fire resistance. Fire Rating: Trays with higher fire-resistance ratings or intumescent coatings cost more. Design and Size: Fully enclosed or large-span trays are pricier than standard open trays. Environmental Protection: Trays designed for corrosive or outdoor environments (UV, saltwater, chemicals) may increase cost. Accessories: Covers, fireproof pillows, pads, and intumescent wraps for sealing gaps add to the total price. Supplier Options Shandong Hongfeng Import and Export Co., Ltd. offers a wide range of cable trays, including trough, wire mesh, and composite types, with customization available. HERMI Solutions provides fire-resistant cable trays for standard or lightweight surface cable paths, with advisory support for selecting the right solution. Flamro specializes in fire protection coatings and tapes for cable trays, enhancing fire resistance and environmental durability. HSP Fire Protection offers intumescent pads, pillows, and wraps for trunking and cable trays, suitable for walls, floors, and ceilings. Recommendation For accurate pricing, it is advisable to contact suppliers directly with your required tray type, material, length, and fire rating. Bulk...
