

Straight-through cable tray price quote

AI Overview

Straight-through cable trays typically range from \$50 to \$200 per 10-foot section, depending on material, size, and coating. Price Overview The cost of straight-through cable trays varies based on material, dimensions, and finish. Common options include:

- Galvanized Steel (GI or HDG):** Standard straight sections are widely available and generally priced between \$50 and \$150 per 10-foot section for typical widths and depths.
- Aluminum Cable Trays:** Lightweight and corrosion-resistant, prices are slightly higher, often \$100–\$200 per 10-foot section depending on thickness and alloy.
- Stainless Steel (304 or 316):** Used in corrosive or industrial environments, prices can range from \$150 to \$300 per 10-foot section.

Specifications Affecting Price

- Width and Depth:** Common widths are 50mm to 200mm, and depths range from 25mm to 150mm. Larger trays for high cable volume cost more.
- Type of Tray:** Ladder, perforated, wire mesh, or trunking styles influence cost. Wire mesh trays are often mid-range in price, while solid trunking may be higher.
- Coating/Finish:** Powder-coated, epoxy-coated, or hot-dip galvanized finishes add to the price due to corrosion protection.

Suppliers and Delivery

Jiangsu Holdee Electric Co., Ltd. offers a variety of straight-through cable trays in stock, with delivery typically 7–20 days after deposit.

Platt Electric Supply and McMaster-Carr provide pre-engineered straight cable trays with specifications suitable for fiber optic, Cat 5e/6/7, and other high-performance cables.

Practical Considerations

When budgeting, consider installation hardware, supports, and covers, which may add 10–20% to the total cost. For large projects, bulk orders may reduce per-unit pricing. Always verify UL classification and grounding requirements for safety compliance.
