

Tonga Distribution Box Circuit Breaker Model

Overview

MNS is a low-voltage switchgear assembled in the factory using standard modules. It is suitable for AC 50/60Hz, rated operating voltage below 660V, and rated current up to 6300A in power distribution systems, used for power distribution, conversion, control, and reactive power. The XL type low-voltage power distribution cabinet uses domestically designed new components. The enclosure is made of bent steel plates, featuring a compact structure, easy maintenance, and flexible circuit scheme combinations. Besides air circuit breakers and fuses for circuit protection, the. Widely used in power generation, construction, steel, cement, mining, petrochemical, and other power supply and distribution systems 1. The. Contextual Info: XPDR/DME TCAS/ADS-B/TIS Test Set IFR 6000 Operation Manual Issue 7 EXPORT CONTROL WARNING: This document contains controlled technology or technical data under the jurisdiction of the Export Administration Regulations EAR, 15 CFR 730-774. We design and manufacture a range of electrical products for the distribution, protection, control and management of electrical systems in low voltage environments.
