

Uganda-branded 12-core wiring unit

AI Overview

A 12-core wiring unit in Uganda is available as a shielded alarm or power cable, suitable for multiple electrical and signal applications. Overview The 12-core wiring unit is a multi-conductor cable designed for power, signal, and alarm systems. It typically features 12 insulated cores bundled together, often with shielding to reduce electromagnetic interference, making it ideal for sensitive electrical installations. These cables are used in industrial, commercial, and residential settings, connecting devices such as lighting systems, power equipment, instruments, and alarm systems.

Specifications

- Core Count: 12 cores
- Shielding: Available with metallic or foil shielding for signal protection
- Voltage Rating: Suitable for various voltages depending on the manufacturer
- Material: High-quality copper conductors for durability and conductivity
- Standards Compliance: Many Uganda-branded cables meet UNBS certification and international standards like IEC-60227 and IEC-60502
- Customization: Some suppliers offer customizable specifications to match specific installation requirements

Applications

- Power Distribution: Connecting multiple devices in industrial or commercial setups
- Alarm Systems: Reliable transmission of signals for security and monitoring
- Lighting and Instrumentation: Ensures stable power and signal flow for sensitive equipment
- Data and Communication: Can be used in low-voltage signal transmission where shielding is required

Suppliers in Uganda

- UG Cable: Offers 12-core shielding alarm cables with customizable specifications and professional after-sales support
- Total Cables Ltd: Produces high-quality copper cables and wiring units, certified by UNBS, suitable for homes, businesses, and industrial applications
- Fern Engineering & Supplies: Supplies a wide range of cables, wires, and connectors, including multi-core and armored cables for both indoor and outdoor installations

Installation and Safety

Always use a certified electrician for installation to prevent electrical hazards. Ensure the cable size matches the current load to avoid o...
