

Upgraded version of integrated container rack for subway use

Overview

Super Rack is a revolutionary 9' 6" flat rack container with its unique telescopic corner posts. It can be extended up to 13' 6" (4. 11 m) with height adjustments every 1 foot (30 cm) at four different levels. We specialize in designing and manufacturing robust 19" subrack solutions for Train Control and Management Systems (TCMS) and critical onboard electronics. Our products are not just specifications on a page; they are proven components deployed in some of the most advanced rail projects in China and. Features: Water container lets you dispense water at the campsite Removable spigot provides a convenient way to pour water - simply turn the lever on and off Take off spigot to refill with water, then replace to seal the containerIntegrated handle makes it easy to carry when the container is full. The sturdy 19" subracks are ideal for basic applications. Icons with a continuous outer circle describe a standard characteristic of the product series or one of its variants. In addition to the racking system, our complete turnkey solutions are supplied with electricity, ventilation, insulation, and decals. The Mk II Cargo Rack is like the standard Cargo.
