

Using a white-megabit router with gigabit fiber optic cable

Overview

When selecting a router for fiber optic internet, ensure it is a “fiber compatible router” with a Gigabit WAN port. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. If you're looking to understand how to connect fiber optic cable to router, you've come to the right place. Update: On Sep 23, 2024, the S34 model was released with the same design and specs as the S33, with one exception: It has up to 200Mbps upload speed compared to the 100Mbps of the. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. I worked with the Cybernews research team to review and compare different routers and give.
