

What paint should be used on cable trays in a network server room

Overview

Cablofil recommends Dry Fall paint (also referred to as Drop Dry) for trays installed in ceilings. To ensure that cable trays perform well under diverse and challenging environmental conditions, selecting the right surface treatment and coating system is vital. The ISO 12944 standard provides valuable guidelines for this purpose. Key advantages: Painting also allows for colour customization, making it suitable for. Where should you use EG cable tray?

Best for: Dry, indoor spaces only. Offices, server rooms, shops, warehouses – places with clean air and no damp. The surface does not include an oily film, typical on many metal products, so no special cleaning is required outside of the tray being dry and. You should paint the backboard with two coats of nonconductive, fire-retardant paint of a light color. You should mount a 300 mm (12 in.
